

2A-Epi-Methylol™

Advanced Muscle Builder

Pack on some serious muscle with House of Muscle's 2A-Epi-Methylol™. 2A-Epi-Methylol™ is short for 2a, 3a epithio-17a-methyl-5a-androstan-17b-ol. In our opinion, **only healthy adult men should use this product.** We recommend that this product should **not** be used by anyone under 18 years of age, women, or anyone with preexisting medical conditions or health problems.

Second, we want to strongly stress that this product should only be used as we recommend it to be used and that our recommended dosage and length of time the product is taken should never be exceeded.

Our last important point is that this product is currently legal to sell, obtain and possess in the United States as a dietary supplement. The key word here is "currently". At HouseOfMuscle.com, we only sell legal, dietary supplements and if the legal status of this product should change, we will no longer sell this product.

Okay, now that we have that stuff out of the way, let's get into what 2A-Epi-Methylol™ is all about. **2A-Epi-Methylol™ is an extremely potent anabolic pre-cursor. 2A-Epi-Methylol™ is only for hard-core weightlifters and bodybuilders**

looking to dramatically increase muscle, strength, size and definition without any water retention.

2A-Epi-Methylol™ binds to the androgen receptor **300% better than testosterone** and is also a 5-alpha-reduced compound, meaning it cannot convert to dyhydrotestosterone (DHT) or estrogen, so you will see massive gains in muscle, strength and size with virtually zero side effects (if you take the product as we

2A-Epi-Methylol™ is only for hard-core weightlifters and bodybuilders looking to dramatically increase muscle, strength, size and definition without any water retention.

recommend and do not exceed recommended dosages or the length of time we recommend to take it). **Bottom line,**

2A-Epi-Methylol™, combined with proper nutrition and training, will definitely lead to dramatic lean muscle gain.

Each bottle of 2A-Epi-Methylol™ contains 90 capsules with 10mg each of pure, pharmaceutical grade 2a, 3a epithio-17a-methyl-5a-androstan-17b-ol. This product is manufactured right here in the United States at a CGMP (Current Good Manufacturing Practice) facility, which ensures that the product is pure and effective.

Now let's talk availability. I have been able to secure a very limited supply

of this product. *Due to the hard-core "gray market" nature of this product, there is no way I can be sure I will be able to get more of this product when my limited supply is gone.*

Basically, if you want to try this product, you need to order quickly and if you think you want to take it over a long period of time, you need to stock up, because it is my belief that when my limited supply is gone, that will be it and I will not be able to get anymore of this product again.

Remember, this product is most likely only available for a limited time. So, if you are an advanced weightlifter or bodybuilder and are looking to dramatically increase your muscle, strength, size and definition (without any water retention), then 2A-Epi-Methylol™ is definitely the product for you.

What are you waiting for? Get your House of Muscle **2A-Epi-Methylol™** today at:
