

BETA-ECDYSTERONE

Anabolic Environment Enhancer

Beta-Ecdysterone Will Help You Build Muscle And Strength

Beta-Ecdysterone helps produce a highly anabolic environment in the body resulting in numerous performance enhancing benefits. *This powerful compound will definitely help you build lean, hard muscle and increase your strength.*

Beta-Ecdysterone is especially good for “hard gainers” (guys who have a hard time putting on muscle and size), but it will also help anyone who wants to build muscle and strength. Best of all, it is proven safe and effective *without any negative side effects!* Beta-Ecdysterone is one incredible supplement. In fact, it may not be an overstatement to say that **Beta-Ecdysterone will be the next great sports nutrition supplement** and will have the same impact on the sports nutrition industry that creatine did back in 1996.

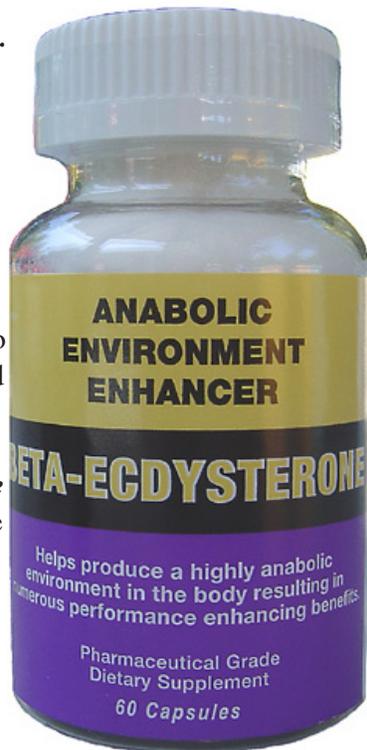

House Of Muscle’s Beta-Ecdysterone provides an impressive 500mg per single capsule of this powerful herbal extract. We will get into more detail later on why this dosage level is so important, but for now realize the fact that extensive research has proven, *when Beta-Ecdysterone is combined with a high protein diet, it will produce a highly anabolic envi-*

ronment in the body and will definitely help you build the strong, lean muscular body you desire.

How Does Beta-Ecdysterone Work?

One of the most important factors in maximizing muscle growth is the anabolic environment in the body.

When you take Beta-Ecdysterone you will create the optimum anabolic environment

in the body for building muscle and strength.

Beta-Ecdysterone works to maintain a positive nitrogen balance and increase protein synthesis in the body. When hard training and a high protein diet is combined with the optimum anabolic environment in the body – **MUSCLE AND STRENGTH GROWTH WILL OCCUR!**

The great thing about Beta-Ecdysterone is that it helps maintain a positive nitrogen balance and increased protein synthesis **without any negative side effects!** This is

why researchers have been so enthralled with Beta-Ecdysterone since way back in 1963 when studies first began to bring the amazing muscle building properties of Beta-Ecdysterone to light. This was the beginning of over 50 studies showing the remarkable effects of Beta-Ecdysterone on the body while simultaneously showing no side effects.

The reason it has taken so long for Beta-Ecdysterone to “hit the mainstream” and come to market

... when Beta-Ecdysterone is combined with a high protein diet, it will produce a highly anabolic environment in the body and will definitely help you build the strong, lean muscular body you desire.

as a sports nutrition supplement has to do with finding a way to create a cost effective form of the compound. But that time has come and now *you get to experience the amazing muscle building effects of Beta-Ecdysterone.*

What Can You Expect From Taking Beta-Ecdysterone?

- Dramatic Increase in Lean Body Mass
- Increased Stamina & Endurance
- Stimulated Metabolism
- Improved Nerve Function
- Enhanced Development of Mature Red Blood Cells
- Maintenance of Healthy Blood Sugar Levels

- Reduced Adipose Fat Tissue
- Improvement to Nearly Every Bodily Function Including Brain and Liver
- Safe and Effective Results for Men AND Women
- Prevention of Muscle Mass Loss
- Increased Growth of Muscle Fibers
- No Negative Side Effects
- No Virilization
- No Conversion Into Estrogen
- No Liver Toxicity
- No High Blood Pressure
- No Testicular Shrinkage
- No Negative Effects on the Hormonal System
- Very Low Toxicity Levels

Why Is The Dosage So Important With Beta-Ecdysterone?

All the extensive research that shows Beta-Ecdysterone to be truly effective used dosages of **at least 500mg per day and the best results were shown at even higher dosages of 2,000mg per day.** These dosages are significantly more than what is provided in most nutritional formulas containing Beta-Ecdysterone on the market today. I have seen dosages as low as 15mg in some Beta-Ecdysterone supplements. **What is 15mg going to do? NOTHING!**

This is one of my big pet peeves with the supplement industry. Supplement companies will try to capitalize on the excitement about a compound like Beta-Ecdysterone by simply throwing it into a formula, **but the dosage they use is just too low to produce real results.** *They do this to improve their profit margin since their main concern is making money, not bringing a quality product to market that will produce real results.* **Bottom line — the dosage of Beta-Ecdysterone**

used by many nutritional companies is significantly lower than that recommended by researchers and simply too low to produce positive results.

This is definitely not the case with House Of Muscle's Beta-Ecdysterone. Each capsule of our product contains 500mg of pure Beta-Ecdysterone. *This means that you can use the product in a way that replicates the extensive research studies on Beta-Ecdysterone and you will get the positive results these studies proved are possible.*

It is also important to note that the toxicity level of Beta-Ecdysterone is very low. Research has shown that you can take up to 4,000 times the dosage we recommend without any toxic side effects. So, it is almost impossible to take "too much" Beta-Ecdysterone and anyone who tells you the dosage we recommend is too high is just trying to justify the lower dosage they sell and the research proves they are wrong. **Bottom line — to get the best results with Beta-Ecdysterone take the dosage we recommend, the same dosage proven to produce results in all the research, between 500mg and 2000mg per day.**

How Should You Take Beta-Ecdysterone?

At House Of Muscle we believe the best way to take Beta-Ecdysterone is in a pyramid fashion, where you start by taking 500mg per day and then gradually increase the dosage over time up to 2,000mg per day. Then you gradually decrease the dosage back down, over time, to 500mg per day.

This pyramid cycling limits receptor downgrade and will maximize

results. We are not saying you cannot get great results when taking only one 500mg capsule a day, because you can, and we are not pushing this pyramid cycle to get you to buy more product. We simply believe this is the best manner to take Beta-Ecdysterone to get maximum results. We offer a 15 Week Pyramid Cycle of Beta-Ecdysterone, where everything is outlined for you and shows you exactly how to take it, for those of you who decide to take it in this fashion. We highly recommend it.

Each bottle of House Of Muscle's Beta-Ecdysterone contains 60 capsules and each capsule contains 500mg of pure Beta-Ecdysterone.

Well, there you have it. Beta-Ecdysterone is certainly an amazing and exciting compound. If used in the manner outlined by House Of Muscle, ***it will definitely help you build the strong, lean, muscular body you desire.*** Offers like this don't come along too often. **The time to act is NOW! ORDER TODAY!**
